

JUAN FELIPE MEDINA ORJUELA

Ibagué, Colombia +57 316 048 0641 Juan.Medina@estudiantesunibague.edu.co github.com/Sekkon0906

EDUCATION

Universidad de Ibagué

Jan. 2022 – Dec. 2027 (expected)

B.S. in Systems Engineering · Ibagué, Colombia

- Semester 8 of 10. Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming, Databases, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence, Computer Graphics (OpenGL).

EXPERIENCE

Independent Software Developer

2023 – Present

Freelance · Ibagué, Colombia

- Designed and delivered 7 full-stack software projects for real clients and end users; 5 are currently live in production.
- Integrated generative AI (GPT-4, Groq, Gemini, Anthropic Claude) into production systems, including an autonomous WhatsApp sales agent and a conversational assistant capable of executing 50+ real business actions (GESTEK Gestbot).
- Built event-driven and signal-oriented architectures, end-to-end automation workflows with n8n, and payment integrations with MercadoPago featuring HMAC-verified idempotent webhooks.
- Consistent use of React, Angular, Next.js, Node.js (Express), Supabase, PostgreSQL, and TailwindCSS in production projects with real clients across Colombia.

SELECTED PROJECTS

GESTEK Event OS — AI-Powered SaaS Event Management Platform

2026

React 18 · Node.js (Express 5) · Supabase · PostgreSQL · Groq / Gemini / Claude · MercadoPago · TailwindCSS · Web Push

- White-label SaaS: event creation, JWT-signed QR ticketing, check-in, team management with granular roles, Kanban tasks, loyalty points, and analytics dashboard.
- Gestbot AI assistant with 50+ real event actions (create, publish, edit, check-in, send reminders) via natural language, form prompting, and PDF/image analysis. Multi-provider failover: Groq → Gemini → Claude.
- MercadoPago Checkout Pro for ticket sales and Pro plan billing; HMAC-verified idempotent webhooks; manual fallback mode.
- Live: gestor-eventos-frontend.vercel.app — Code: github.com/Sekkon0906/GestorEventosMarcaBlanca

New Blood Premium BARF — Admin Panel + AI WhatsApp Sales Agent

2026

Vanilla JavaScript · Supabase · n8n · LangChain · GPT-4.1-mini · Whapi.cloud · Chart.js · PostgreSQL

- Frameworkless admin panel with real-time dashboard, full order lifecycle management (pending → paid → shipped → delivered), automatic stock deduction, PDF shipping labels, and CSV export.
- Autonomous agent "Diana": complete WhatsApp sales flow from greeting to order confirmation; handles audio, images, and internal signals (ORDER_CONFIRMED, END_CONVERSATION).
- Daily automated restock workflow: calculates estimated depletion date and sends proactive WhatsApp reminders 3 days before, via n8n cron + Supabase views.

Wallnut — Gamified University Wallet

2025

Next.js · TypeScript · PostgreSQL

- University app with a gamified digital wallet for students, faculty, and administrators. Ardys points system incentivizes participation in academic events and activities.

SorteosCCM — Online Raffle Platform

2025

Angular 17 · TypeScript · Supabase · PostgreSQL · SSR · Clean Architecture

- Raffle platform for the Colombian Paso Horse community. Feature-Sliced + Clean Architecture over Angular 17 standalone with SSR and Supabase Edge Functions for serverless logic. Live: caballoscolombianosymas.com

Ardy-IA — AI Language Learning Platform

2024

Python · OpenAI GPT-4 · Whisper · DALL·E

- Web platform that detects user language, corrects errors in real time, generates voice with Whisper, and produces images for visual practice; adapts to user level and progress. 1 GitHub fork. Code: github.com/Sekkon0906/Ardy-IA

CoffeeOps — Coffee Operations SaaS

2024

Vanilla JavaScript · SaaS

- Centralized management platform for cafeterias and coffee producers: inventory, lots, suppliers, documents, team, and real-time analytics. Code: github.com/Sekkon0906/Coffee-management

Consultorio Estético Dra. Juliet Medina — Medical Aesthetic Web App

2023

Next.js · TypeScript · NextAuth · PostgreSQL

- Full-stack clinical management application with secure authentication, admin panel, appointment and procedure management. Led full front-end development and complete back-end migration.

TECHNICAL SKILLS

Languages	JavaScript (primary), TypeScript, Python, Java, C/C++, HTML5, CSS3
Frameworks	React 18, Next.js, Angular 17, TailwindCSS, Flutter, Laravel, Three.js, OpenGL, TensorFlow, Keras
Backend / DB	Node.js (Express), Supabase, PostgreSQL, MySQL, Firebase, REST API, Realtime
AI / Automation	OpenAI API (GPT-4, Whisper, DALL·E), Groq, Gemini, Anthropic Claude, LangChain, n8n
Integrations	MercadoPago, Whapi.cloud, Web Push (VAPID), Cloudflare Turnstile, Resend / Gmail SMTP
Tools	Git, GitHub, Docker, Vercel, Postman, Figma, VS Code, IntelliJ IDEA

LANGUAGES

Spanish	Native
English	Intermediate — strong listening comprehension, solid reading, effective communication
